As we look back through the years,
We discover that everything has changed.
As it now continues to change each new day,
We must set out to pace ourselves with tomorrow.

J. H. Wilkes

"What time does not forget man does"

And in this case a great man has been truly forgotten through the passing years. He has worked persistently, striving to achieve the impossible at W. H. Adamson, perfection in a "Big A" way. He has elected to spend numerous hours helping students when no one else would listen, much less take time to understand.

It is difficult to express in words the many ways he has helped the student body. Through his advice, he has encouraged many students; under a firm hand, others have learned discipline. No honor we can bestow is great enough to express our appreciation for the amount of work and time that he has given us. For his devotion, we the 1979 OAK Staff with great pride, dedicate our yearbook to . . . our friend . . . OUR ASSISTANT PRINCIPAL,

HARIEL WILEY

Make new friends, but keep the old;
Those are silver, these are gold.

New-made friendships, like new wine,
Age will mellow and refine.

Friendships that have stood the test —
Time and change — are surely best;

Brow may wrinkle, hair grow gray;
Friendship never knows decay.

For mid old friends, tried and true,
Once more we our youth renew.

But old friends, alas! may die;
New friends must their place supply.

Cherish friendships in your breast —
New is good, but old is best;

Make new friends, but keep the old;
Those are silver, these are gold.

— Joseph Parry

1978-79 Mr. and Miss Howdy

Miguel Garcia and Carolina Martinez

A friend is one who knows you as you are, understands where you've been, accepts who you become and still gently invites you to grow.

1978-79 Uglyman

O do not praise my
beauty more,
In such world
wide degree
And say I am one
all eyes adore;
For these things
harass me!

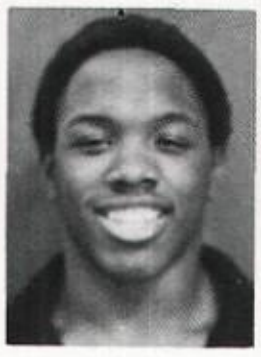
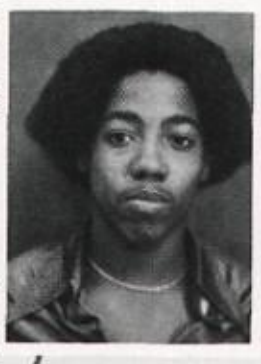
Verify the following:

$$\frac{\cot\theta - \cos\theta}{\cot\theta\cos\theta} = \frac{\cot\theta\cos\theta}{\cot\theta + \cos\theta}$$





$\cos\theta \neq 0$

$\sin\theta \neq 1$

Find the equation of the line containing the points $(5,2)$ and $(-1,8)$.

$$m = \frac{8-2}{-1-3} = -\frac{3}{2}$$

$$y - y_1 = m(x - x_1)$$

$$2(y-4) = -3(x-3)$$

$$2y - 4 = -3x + 9$$

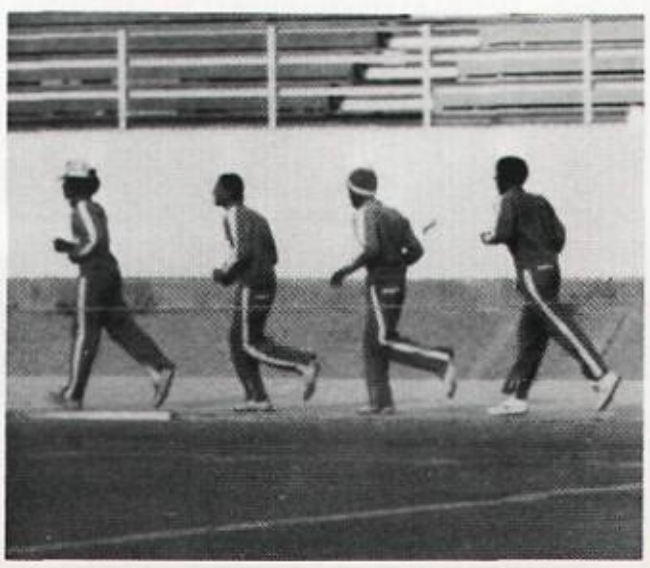
We train all week. We run our miles. We strain to cut our time a second or two. We rise early on judgement day to face our competitors each of us ready to compete. We cheer our fellow team members on.

Win or lose there are words of encouragement at the finish line. We know only one type of victory, that of self accomplishment. As long as we do our best, that's all that counts.



Third is better than last.

Victory is mine.

A Graduate's Prayer
by Helen Steiner Rice

How to use it wisely
and find a way somehow
Father, I have knowledge
so will you show me now
To make the world I live in
a little better place,
And make life with its problems
a bit easier to face . . .
Grant me faith and courage
and put purpose in my days
And show me how to serve Thee
in the most effective ways
So all my education,
my knowledge and my skill,
May find their true fulfillment
as I learn to do Thy Will
And may I ever be aware
in everything I do
That knowledge comes from learning
and wisdom comes from You.
